

SenesTech Hires Andrew Altman as Chief Operations Officer

FLAGSTAFF, Ariz., June 2, 2017 /[PRNewswire](#)/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, today announced the hiring of Andrew Altman as Chief Operations Officer, with primary responsibility for sales, marketing and manufacturing operations.

"We are very excited to welcome Andy to our team as we capitalize on his experience to accelerate our Commercialization plan to meet the increasing demand for ContraPest," said Dr. Loretta P. Mayer, Chair, CEO and co-founder of SenesTech. "Andy's background and enthusiasm for the technology is an ideal fit for the engaged and dedicated staff of SenesTech."

Mr Altman comes to SenesTech from IDEXX Laboratories, a well-known animal health company, with 30 years of commercial and executive leadership experience in the life science marketplace. Mr. Altman has had extensive success in launching new and disruptive products.

"Contra Pest safely and sustainably addresses the age-old problem of rodent control in an environmentally friendly manner. I'm pleased to be part of a team that leverages science and social responsibility," noted Mr. Altman. "My initial focus will be to expand the sales process to rapidly address the market, and to solidify a robust manufacturing capacity and supply chain to meet what we are confident will be explosive demand."

Prior to joining SenesTech, Mr. Altman was Vice President and General Manager at IDEXX BioResearch, a provider of biological materials testing and laboratory animal diagnostic services, a division of IDEXX Laboratories.

About SenesTech

SenesTech has developed an innovative technology for managing animal pest populations through fertility control as opposed to a lethal approach.

The Company's first fertility control product, ContraPest[®], is marketed for use initially in controlling rat infestations. ContraPest's novel technology and approach targets the reproductive capabilities of both sexes, inducing egg loss in female rodents and impairing sperm development in males. Using proprietary bait stations, ContraPest is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rodent communities. ContraPest is designed, formulated and dispensed to be safe for handlers and non-target species such as wildlife, livestock and pets, in a biodegradable product. In contrast, the historical approach to managing rodent pest populations, rodenticides, carries a high risk of environmental contamination and the poisoning of non-target animals, pets and children.

We believe our non-lethal approach, targeting reproduction, is more humane, less harmful to the environment, and more effective in providing a sustainable solution to pest infestations than traditional lethal pest management methods. There is currently no other non-lethal fertility control product approved by the Food and Drug Administration (FDA), or the Environmental Protection Agency (EPA), for the management of rodent populations. We believe ContraPest[®] will establish a new paradigm in rodent control, resulting in improved performance in rodent control over rodenticides, without the negative environmental effects of rodenticides.
