

SenesTech Announces Distribution Agreement with Agri-Turf Distributing, LLC

FLAGSTAFF, Ariz., Aug. 16, 2018 /PRNewswire/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, today announced a distribution agreement for ContraPest® with Agri-Turf Distributing, LLC ("Agri-Turf"), a pest management distributor based in Santa Fe Springs, California.

"Agri-Turf's management team has deep experience in the pest management industry, particularly in the California market, and their team believes in delivering the most innovative technology and products to their customers.

They specialize in providing excellent service and coverage in market niches that complement our current distribution coverage," says Joe Malinowski, V.P. of Sales for SenesTech. "Our partnership and shared commitment to provide proven solutions for pest management professionals (PMPs), will be the cornerstone for continued growth in California, one of the largest markets in the US pest control industry."

In addition to distribution, SenesTech and Agri-Turf will partner on marketing initiatives and product trainings to support continued awareness and growth within the California market.

"We are excited about the opportunity to carry this new rodent control product, and we look forward to introducing ContraPest to PMPs as a new tool that has the ability to enhance their rat management programs," said Rich Records, President of Agri-Turf.

Agri-Turf will be a stocking distributor, and has placed their initial stocking order.

About ContraPest

ContraPest® is an innovative technology that targets the reproductive capabilities of Norway and roof rats. As a highly palatable liquid, the formulation promotes sustained consumption, helping to reduce fertility in both male and female rats, bringing populations down and keeping them down. Our delivery system is designed to minimize handler exposure, and ContraPest is dispensed inside tamper resistant bait stations, minimizing the risks to non-target species.

As a versatile tool, ContraPest can be used within Integrated Pest Management (IPM) programs to help reduce reproduction and magnify the success of IPM protocols or as a standalone, non-lethal solution for customers that are looking to reduce or eliminate the use of lethal methodologies.

ContraPest is a Restricted Use Pesticide, due to applicator expertise. Please read and comply with all label instructions. Target species: Norway and roof rats.

About SenesTech

SenesTech has developed and is in the process of commercializing a proprietary technology for managing animal pest populations, primarily rat populations, through fertility control. For more information visit the SenesTech website at www.senestech.com.
