

SenesTech Confirms Reports of Chicago Pilot Program for ContraPest

CHICAGO and Flagstaff, Ariz., July 31, 2017 /PRNewswire/ -- SenesTech, Inc. (NASDAQ: SNES) has confirmed reports in the Chicago Tribune and other media outlets on July 25, 2017, that the City of Chicago is commencing a new pilot program for controlling rodent populations utilizing ContraPest, SenesTech's lead product for controlling rodent infestations through fertility control.

- Chicago Tribune: *Chicago adds rat birth control to rodent-fighting arsenal* <http://fw.to/gwCm37E>
- WGN-TV: *Chicago to fight rat population with contraception product, dry ice* <http://via.wgntv.com/3NdJA>
- CBS 2 Chicago video: <https://youtu.be/pyWo6Z07T3w>

ContraPest's novel technology and approach targets the reproductive capabilities of both sexes, inducing egg loss in female rodents and impairing sperm development in males. Using proprietary bait stations, ContraPest is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rodent communities. ContraPest is designed, formulated and dispensed to be safe for handlers and non-target species such as wildlife, livestock and pets, in a biodegradable product. In contrast, the historical approach to managing rodent pest populations, rodenticides, carries a high risk of environmental contamination and the poisoning of non-target animals, pets and children.

As agreed upon between SenesTech and The City of Chicago, SenesTech will not be making any additional comments on the study at this time.

About SenesTech

SenesTech has developed an innovative technology for managing animal pest populations through fertility control as opposed to a lethal approach.

The Company's first fertility control product, ContraPest[®], is marketed for use initially in controlling rat infestations. ContraPest's novel technology and approach targets the reproductive capabilities of both sexes, inducing egg loss in female rodents and impairing sperm development in males. Using proprietary bait stations, ContraPest is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rodent communities. ContraPest is designed, formulated and dispensed to be safe for handlers and non-target species such as wildlife, livestock and pets, in a biodegradable product. In contrast, the historical approach to managing rodent pest populations, rodenticides, carries a high risk of environmental contamination and the poisoning of non-target animals, pets and children.

We believe our non-lethal approach, targeting reproduction, is more humane, less harmful to the environment, and more effective in providing a sustainable solution to pest infestations than traditional lethal pest management methods. There is currently no other non-lethal fertility control product approved by the Food and Drug Administration (FDA), or the Environmental Protection Agency (EPA), for the management of rodent populations. We believe ContraPest[®] will establish a new paradigm in rodent control, resulting in improved performance in rodent control over rodenticides, without the negative environmental effects of rodenticides.
