

SenesTech Signs a Distribution Agreement with Univar for ContraPest®

FLAGSTAFF, Ariz., Oct. 23, 2017 /[PRNewswire](#)/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, today announced a national distribution agreement with Univar for ContraPest®. In addition to distribution, Univar will be marketing and selling ContraPest throughout its network.

"Univar is an excellent sales and distribution partner for SenesTech, with their extensive breadth and depth of coverage, their direct connection with the pest control operators, and their commitment to sustainability. They will immediately provide us with nationwide sales coverage and nine dedicated sales representatives," said Dr. Loretta P. Mayer, Chair, CEO and co-founder of SenesTech. "As they have assured us, as our distributor, Univar sees their role as an active partner in creating and building a market for ContraPest."

About SenesTech

SenesTech has developed an innovative technology for managing animal pest populations through fertility control as opposed to a lethal approach.

The Company's first ContraPest's novel technology and approach targets the reproductive capabilities of both sexes, inducing egg loss in female rodents and impairing sperm development in males. Using a proprietary bait delivery method, ContraPest is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rat communities. ContraPest is designed, formulated and dispensed to be safe for handlers and non-target species such as wildlife, livestock and pets, where the active ingredients break down rapidly, unlike rodenticides. In contrast, the historical approach to managing rodent pest populations, rodenticides, carries a high risk of environmental contamination and the poisoning of non-target animals, pets and children. ContraPest is a Restricted Use product.

We believe our non-lethal approach, targeting reproduction, is more humane, less harmful to the environment, and more effective in providing a sustainable solution to pest infestations than traditional lethal pest management methods. There is currently no other non-lethal fertility control product approved by the Food and Drug Administration (FDA), or the Environmental Protection Agency (EPA), for the management of rodent populations. We believe ContraPest® will establish a new paradigm in rodent control, resulting in improved performance in rodent control over rodenticides, without the negative environmental effects of rodenticides.
