

# California Department of Pesticide Regulation Has Approved SenesTech's ContraPest® For Sale And Use in California

FLAGSTAFF, Ariz., July 16, 2018 /PRNewswire/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, today announced that the California Department of Pesticide Regulation (CDPR) has approved ContraPest® for sale and use in California under registration #91601-1-AA. The Company expects to focus on marketing and sales efforts of ContraPest in California immediately.

"California is the fifth largest economy in the world and one of the top three state markets for pest control nationally, which is immediately attractive for any developer of innovative pest management solutions. In addition, California consistently leads the way with respect to innovative and environmentally sensitive policies, and California consumers demand products which are effective, are as safe as possible, are ethical, and pose the least burden on the planet. This makes California a particularly important market for ContraPest, which was designed with the same principles," said Dr. Loretta P. Mayer, co-Founder and CEO of SenesTech.

## About ContraPest

ContraPest® is an innovative technology that targets the reproductive capabilities of Norway and roof rats. As a highly palatable liquid, the formulation promotes sustained consumption, helping to reduce fertility in both male and female rats, bringing populations down and keeping them down. Our delivery system is designed to minimize handler exposure, and ContraPest is dispensed inside tamper resistant bait stations, minimizing the risks to non-target species.

As a versatile tool, ContraPest can be used within Integrated Pest Management (IPM) programs to help reduce reproduction and magnify the success of IPM protocols or as a standalone, non-lethal solution for customers that are looking to reduce or eliminate the use of lethal methodologies.

ContraPest is a Restricted Use Pesticide, due to applicator expertise. Please read and comply with all label instructions.

## About SenesTech

SenesTech has developed and is in the process of commercializing a proprietary technology for managing animal pest populations, primarily rat populations, through fertility control. For more information visit the SenesTech website at [www.senestech.com](http://www.senestech.com).

## Safe Harbor Statements

This release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended and such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. "Forward-looking statements" describe future expectations, plans, results, or strategies and are generally preceded by words such as "may," "future," "plan" or "planned," "will" or "should," "expected," "anticipates," "draft," "eventually" or "projected." You are cautioned that such statements are subject to a multitude of risks and uncertainties that could cause future circumstances, events, or results to differ materially

from those projected in the forward-looking statements, including the risks that actual results may differ materially from those projected in the forward-looking statements as a result of various factors and other risks identified in our filings with the Securities and Exchange Commission. Forward-looking statements include but are not limited to, our expectations regarding the California pest control market, including our expectations regarding the timing of our marketing, sales and shipments of our products. All forward-looking statements contained in this press release speak only as of the date on which they were made and are based on management's assumptions and estimates as of such date. We do not undertake any obligation to publicly update any forward-looking statements, whether as a result of the receipt of new information, the occurrence of future events or otherwise.
