

SenesTech and Pestmaster Announce ContraPest® Deployment in Southern California Transit Agency

FLAGSTAFF, Ariz. and RENO, Nev., March 6, 2019 /PRNewswire/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, and Pestmaster Services (Pestmaster), a pest control industry leader and one of the leading authorities on Integrated Pest Management (IPM) solutions, announced today deployment of ContraPest® in a major transit agency in Southern California.

Pestmaster, who has an IPM contract with the large Southern California metropolitan transit agency, had previously submitted ContraPest for the agency's approval. The approval to deploy ContraPest was received on February 27. Pestmaster will move immediately for an initial deployment, and continue to deploy as needed within the guidelines of their IPM program.

"ContraPest is an integral part of our IPM strategy," said Jeff Van Diepen, founder and CEO of Pestmaster. "With this approval and deployment, we can now expand our use of ContraPest to other, similar agencies."

"Rat control challenges in California have been in the news lately, with numerous reports of rat infestations and related problems that are not responding to traditional methods. IPM that includes fertility control may well be the answer to those challenges," said Dr. Loretta Mayer, CEO and co-founder of SenesTech. "As with Washington D.C., bringing a new approach to a century's old problem requires the commitment and vision of an entire community. We look forward to working with Pestmaster, and forward-looking communities in achieving that vision of a safe and sustainable environment."

About SenesTech

SenesTech is changing the paradigm of pest management by targeting the root cause of the problem: reproduction.

ContraPest® is an innovative technology with an approach that targets the reproductive capabilities of both sexes in rat populations, inducing egg loss in female rats and impairing sperm development in males. Using a proprietary bait delivery method, ContraPest® is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rat communities. ContraPest® is designed, formulated and dispensed to be low hazard for handlers and non-target species such as wildlife, livestock and pets, where the active ingredients break down rapidly.

We believe ContraPest® will establish a new paradigm in rodent control, resulting in a decreased reliance on lethal options. For more information visit the SenesTech website at www.senestech.com.

Safe Harbor Statement

This release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended and such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. "Forward-looking statements" describe future expectations, plans, results, or strategies and are generally preceded by words such as "may," "future," "plan" or "planned," "will" or "should," "expected," "anticipates," "draft," "eventually" or "projected." You are cautioned that such statements are subject to a multitude of risks and uncertainties that could cause future circumstances, events, or results to differ materially from those in the forward-looking statements, including the risks that actual results may differ materially from those projected in the forward-looking statements as a result of various factors and other risks identified in our filings with the Securities and Exchange Commission. Forward looking statements include, but are not limited to, our

expectation regarding sales commitments, our expectation regarding the conversion of sales commitments and programs to revenue, our belief that our product is more humane, less harmful to the environment and more effective than traditional methods, and our belief that ContraPest will establish a new paradigm in rodent control without environmental effects of rodenticides. All forward-looking statements contained in this press release speak only as of the date on which they were made and are based on management's assumptions and estimates as of such date. We do not undertake any obligation to publicly update any forward-looking statements, whether as a result of the receipt of new information, the occurrence of future events or otherwise.
