

SenesTech's Brandy Pyzyna to Present Fertility Control Webinar on Wednesday March 27, 2019 at 2:00pm ET (11:00am PT)

FLAGSTAFF, Ariz., March 26, 2019 /PRNewswire/ -- SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, will be presenting at a webinar on the topic of Fertility Control in Rats. Brandy Pyzyna, Vice President of Scientific Operations and Technical Services, has authored and co-authored numerous papers and articles in the areas of fertility control and field research. She currently leads a highly skilled team to educate customers and deploy ContraPest® in some of the most difficult environments.

"The use of fertility control to manage overabundant species is not new, but it is not a widely considered tool for most rodent control programs," stated Brandy Pyzyna. The presentation is aimed at discussing the history of fertility control in wildlife management and how fertility control can enhance integrated rodent management programs. Brandy will demonstrate why fertility control is a good tool for highly fecund, short lived animals such as commensal rodent populations and what criteria must exist for a fertility control agent to be successful and how this tool compliments any integrated pest management plan.

"Fertility control is a key tool for your IPM programs that is often seen as a concept of last resort when all else has failed. I know Brandy has a keen insight on why this is too limited a view and will be able to educate the listeners on considering this as part of an initial solution," said Dr. Loretta P. Mayer, SenesTech's CEO and co-Founder.

Webinar Event Details

- Date and Time:** 2:00 pm ET on Wednesday, March 27, 2019
Register for Event: <https://register.gotowebinar.com/register/9185713060887412995>
To Ask a Question: There will be an opportunity to ask question via the webinar feature to submit a question in writing.
Replay: A replay of the presentation will be available following the conclusion of the webinar event.

About SenesTech

SenesTech has developed and is in the process of commercializing a proprietary technology for managing animal pest populations, primarily rat populations, through fertility control.
